### Expanded PTFE Joint Sealant Tape

#### Description

The EPTFE Tape is an inorganic sealant for static applications made of 100% PTFE .  
A unique process converts PTFE to a micro-porous fibrous structure, resulting a sealant with an unsurpassed combination of mechanical and chemical properties. It is supplied with a self-adhesive strip for easy fitting.

#### Typical Applications

Specially suited for sealing flanges connection, pipe systems, hydraulic and pneumatic system, etc.

#### Prime Features

- > Saves money and time
- > There is no scrap or waste, it costs less than other gasket material
- > Installation time is kept to a minimum since there are no templates, precut or special fitting requirements.

#### Specification

Media: Acids, alkalis, solvents, gases, etc.  
Temperature: -240 up to 260 deg.C  
Pressure: 100bar  
PH valve: 0~14  
Density: Grade A/B 0.70/0.80 g/cm<sup>3</sup>  
Other density on request.  
Copyright

**Available in 15' spools 5/8" - 3/4" - 1" wide x 1/8" or 1/4" thick**
